

Ability Projects Ltd are specialists in the sale, design, manufacture, support and refurbishment of fan coiled based, fan based and heat recovery HVAC, for use in both new and refurbished building developments both at home and abroad. This policy provides a framework for setting environmental and quality objectives.

Ability Projects are committed to ensure:

- We continually improve everything we do to ensure our designs, products and service meet or exceed the expectations of our customers.
- We create an environment in which every employee is fully committed to the highest standard of personal quality, and that all products and services supplied by us are fully capable of meeting our customers' requirements.
- We provide a safe and secure working environment for all employees, ensuring that safe equipment and working practices are in place for all operations carried out within the company's premises.
- Our Business Management System is written in accordance with ISO9001, ISO14001, and applicable statutory, regulatory, customer and any other identified requirements. The Management Team will review this system during the management review meetings, to ensure its effectiveness may be continually improved.
- Our company objectives are contained within our Business Management System. These are measurable objectives, which are communicated to and understood by all members of the organisation and reviewed as part of the Management Review process.
- We are committed to protecting the environment, including complying with applicable environmental legislation and other environmental requirements.
- Ensuring openness of our environmental activities with our identified Interested Parties.
- Provide environmental training and encourage our employees to contribute to our environmental Improvement programme.
- Working with our customers to produce product which can contribute to reducing their environmental Impacts.
- Minimising waste through reuse and recycling while minimising energy usage by involving all members of staff in energy conservation initiatives and preventing pollution through training and awareness.
- Continually look for ways to improve our BMS to enhance our performance.

The Management Team will review this policy annually to ensure that It continues to reflect the aims and objectives of the company.
